1 Android Accounts

In order to configure integration with Google for Android Enterprise and Samsung to leverage Knox Mobile Enrolment management the following accounts are required.

If you have any questions about the set up of these accounts please reach out to your Mobile Mentor project contacts.

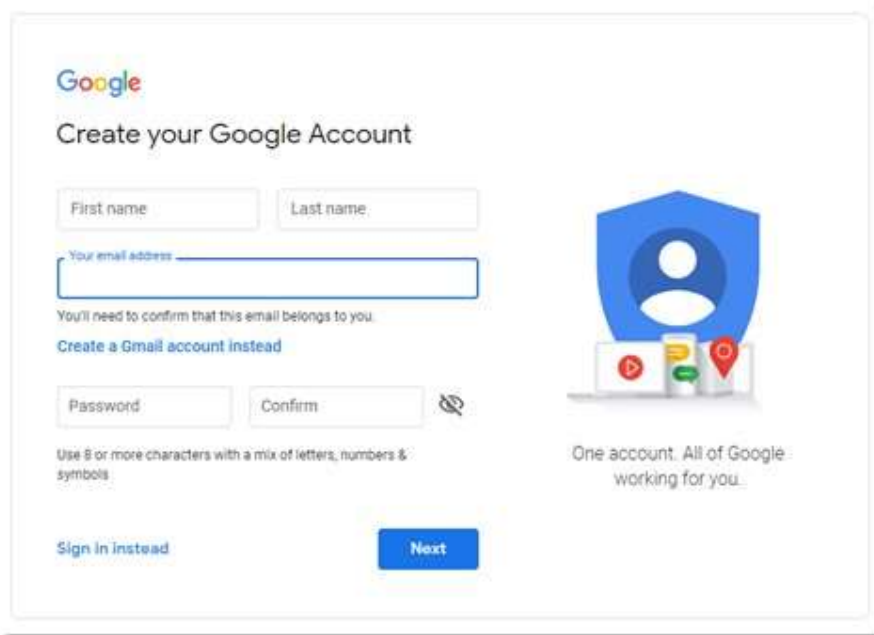

1.1 Managed Google Play Account

For customers with Android devices, a Managed Google Play Account with the organization's email domain will be required for Android Enterprise EMM registration with Google. This account will be used for the following.

- Bind your EMM console to Google for Android Enterprise integration
- Approving applications for deployment

To create a Managed Google Play Account:

1. Create a new mailbox or an email alias of an existing monitored mailbox (e.g. Android.Enterprise-Admin@Companydomain.com)
2. Create new Google Account using the new email address here: <https://myaccount.google.com/intro>

A screenshot of the Google Account creation page. The page has the Google logo at the top left. Below it is the heading "Create your Google Account". There are input fields for "First name", "Last name", and "Your email address". Below the email field is a note: "You'll need to confirm that this email belongs to you." and a link "Create a Gmail account instead". There are input fields for "Password" and "Confirm" with a "Show/Hide" icon. Below the password fields is a note: "Use 8 or more characters with a mix of letters, numbers & symbols". At the bottom left is a link "Sign in instead" and at the bottom right is a blue "Next" button. On the right side of the page is a graphic of a blue shield with a white person icon, and below it are icons for Google Play, Gmail, and Google Maps. To the right of the graphic is the text "One account. All of Google working for you."

1.2 AD Group for Android Enterprise Enrolments

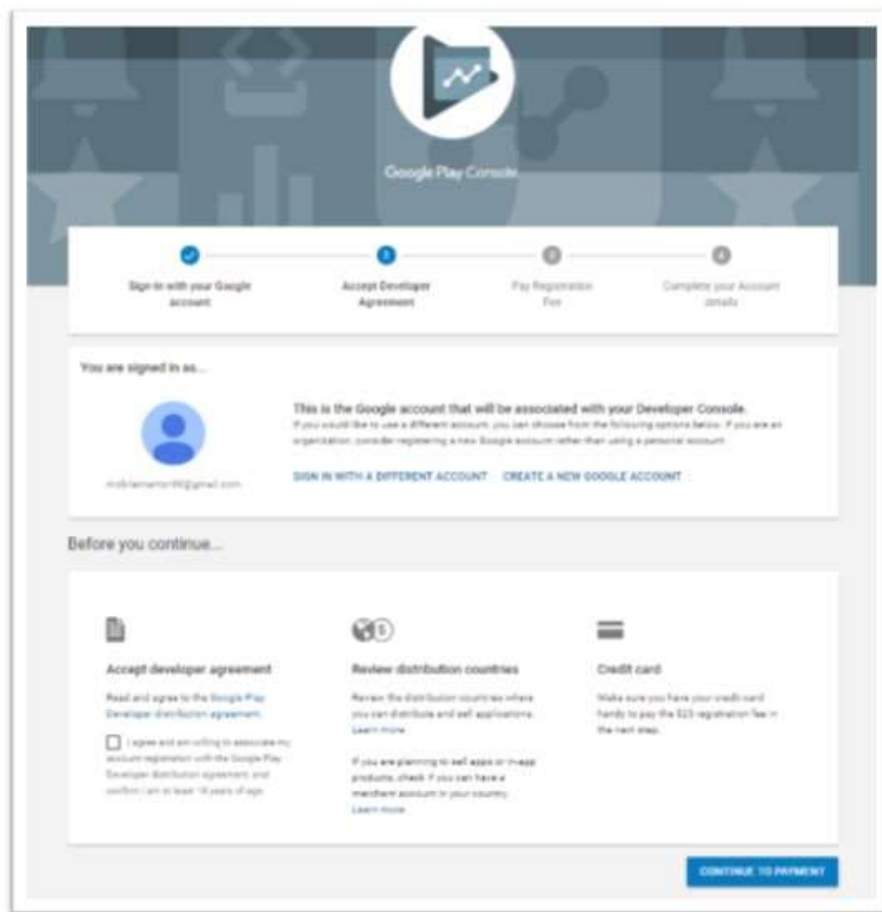

If we want to restrict Android Enterprise Enrolment to specific users or group, then we will need an AD group that users will get dropped into. Devices of users outside that group will get enrolled as Android Legacy. If we want all new device enrolments on Android Enterprise, then this group is not required.

1.3 Google Developer Account

This is required for application publishing. There is a \$25 registration fee to sign up for this account.

To create and sign up for Google Developer Account:

1. Create a new mailbox or an email alias of an existing monitored mailbox (e.g. Google.Developer@Companydomain.com)
2. Create a new Google Account using the new email address here:
 1. <https://myaccount.google.com/intro>
3. Sign up for a Google Developer Account using the new Google account here: <https://play.google.com/apps/publish/signup/>

1.4 Samsung Knox Mobile Enrolment (KME) account

As we have been onboarding customers to Android Enterprise, we have been encouraging Samsung customers to enable Knox Mobile Enrolment at the same time.

To apply for KME portal access:

1. Create a Samsung Account here:
<https://account.samsung.com/membership/intro>
2. Apply for KME Portal access using the Samsung account here:
<https://www.samsungknox.com/en/solutions/it-solutions/knox-mobile-enrollment>

Instruction on how to create Samsung account and apply for KME:

<https://docs.samsungknox.com/KME-Getting-Started/Content/knox-portal-account.htm>

Once your Samsung KME access has been activated by Samsung you can then invite us as an Admin. We will provide an email address to use to send the invite.

The instructions on how to invite and manage admins:

<https://docs.samsungknox.com/KME-Getting-Started/Content/kme-add-an-admin.htm>

Required Admin Role Permissions in KME Portal.

Permissions

☒ Allow access to the Knox Mobile Enrollment portal with the following permissions:

Profiles

☐ View only

☒ Manage profiles (Select at least one permission)

☒ Create and edit
☒ Delete

Devices and uploads

☐ View only

☒ Manage devices (Select at least one permission)

☒ Assign with profile
☒ Unassign from profile
☒ Manage tags
☒ Delete

Resellers

☐ View only

☒ Manage resellers (Select at least one permission)

☒ Register and edit the reseller and approve uploads
☒ Delete

Device Users

☐ View only

☒ Manage device users (Select at least one permission)

☒ Add, edit, assign, and unassign
☒ Delete

Activity log

☒ View activity log

Administrators and Roles

☐ Invite and manage administrators
☐ Manage roles

Note: This is a highly critical permission. Administrators with this permission can add or edit roles to include any permissions in this list, regardless of whether they have that permission or not.

☒ Allow access to the Knox Deployment application: The administrators with this permission can enroll users into Knox Mobile Enrollment directly via the Knox Deployment application.
